Synopsis

The City of Memphis accepts sanitary sewage from municipal satellite sewer systems (i.e., surrounding municipalities). The sewage is transported through the City's wastewater collection and transmission system to one of the City's two wastewater treatment plants. The draft inter-jurisdictional agreement program (Program) stipulates certain contractual requirements to be included in a contract entered into between the City and the satellite municipality for the collection, conveyance and treatment of the sewage. The Program will be used when the City renews existing agreements or enters into a new agreement. The only exception will be the agreement with the Town of Collierville which does not fall under this Program due to the minimal amount of sewage collected by the City from Collierville.

The inter-jurisdictional agreement program addresses (1) proper operation and maintenance of sewage collection and conveyance system; (2) pretreatment; (3) satellite community as a limited NPDES co-permittee with Memphis and (4) term, modification and termination of the Agreement. For pretreatment, options are presented depending upon the underlying circumstances.
